Startup Guide

Thailand

Message from NIA

National Innovation Agency of Thailand or “NIA” is the leading government agency in charge of Thailand’s innovation and startup development. Startup has been a significant strategic policy for economic reform in the Kingdom since 2016. This year commemorates the sixth anniversary of Startup Thailand’s support and facilitation of innovation-based enterprise and the development of an entrepreneurial culture. Startup Thailand has demonstrated that we are prepared to be one of the world’s startup centers, and we invite worldwide tech talents and startups to set up a business in Thailand.

This guide is the only one of its kind, giving you an all-encompassing view of Thailand’s vibrant startup ecosystem landscape while also delving into the country’s and ASEAN’s respective business climates and providing essential information on the capital city of Bangkok and the other regional hubs where startups are flourishing across the country. You’ll get a deeper understanding of the investment climate in Thailand, as well as the funding, incentives, and other tools made available by the Thai government. Finally, this book compiles 50 promising and excellent Thai startups across a range of industries to show you how Thailand is consistently grooming its country and working to become a full-fledged Startup Nation.

Whether you’re an existing Thailand-based startup or thinking about starting one, the Startup Guide Thailand is another crucial resource to help you thrive in the Startup Thailand ecosystem.

Dr. Pun-Arj Chairatana
Executive Director
National Innovation Agency
(Public Organization)

National Innovation Agency (NIA)

What is NIA?

National Innovation Agency (NIA), under the Ministry of Higher Education, Science, Research and Innovation was entrusted by Thai Government to act as a core agency to promote and facilitate creation, management, and exploitation of innovation in Thailand.

Vision

Be the key agency in enhancing Thailand's national innovation system towards sustainable values

Mission

1. To strengthen Thailand's national innovation system
2. To create opportunities and increase access to innovation infrastructure
3. To upgrade skills and innovation capabilities

Thailand Innovation Corridor

NIA focuses on establishing areas of innovation throughout Thailand, as seen in the Thailand Innovation Corridor.

This corridor connects **12 provincial innovation cities** and **12 innovation districts**, areas that receive regulatory and investment support with a focus on certain industries.

12 Innovation City (Area of Innovation)

- Innovation Index for Inclusive, Sustainable and Connected City (Innovation City Index)
- Chief City Innovation Officer (CCIO) Program
- City & Community innovation challenge

12 Innovation District (Innovation Ecosystem)

- Development Plan / Masterplan
- Public Private and Community Partnership: PPCP
- Value Creation: Training, Coaching and Matching
- Data Driven Innovation

Innovation Corridor (National Innovation Policy)

- Smart Specialization Platform (S3)
- Regional Program
- Cluster Connect

Startup Guide *Thailand*

Who is this Startup Guide for?

This Guide is for anyone interested in learning more about Thailand's startup ecosystem, and how they can get involved. However, this Startup Guide is particularly useful for **startups and investors, both new and existing, local and foreign**. The information found in this Guide can help you to set up a new business in Thailand, identify funding or talent development opportunities, and perhaps most importantly, lead you to find new partners and collaborators within the Thai startup ecosystem.

NIA and the rest of Startup Thailand invite you to join an exciting and emerging startup sector ripe with opportunity.

What will you find in this Startup Guide?

The **Startup Guide User Journey** on the next page shows what you can expect to find in the coming pages. This Guide will provide all necessary information on the nature of Thailand's startup ecosystem landscape with details on ecosystem dynamics and stakeholder relationships, Thailand's strategic strengths in the ease of doing business, and abundant infrastructure and resources for startups to incubate and scale, as well as information on regional startup hubs around the country. Readers will also find the essential laws and regulations relevant for startups who are looking to expand to and invest in the Thailand and ASEAN market. Governmental support programs and investment incentives are also highlighted for investors and startups who seek consultation and regulatory support. With the connection of international trade agencies in Thailand's startup ecosystem, investors and startups can connect to more potential partners and scale internationally.

For a more detailed summary of what's to come, read on!

Startup Guide User Journey

Startup Guide *Thailand*

Executive Summary

Thailand is ASEAN's second largest economy and its friendliest business location. In recent years, it has been developing into a regional hub for advanced sectors and smart industries as the government has introduced a series of new incentives, including tax breaks, subsidies for matching investments, and eased laws governing property ownership.

A central location makes Thailand ideal for regional travel and business connectivity, and its rich culture, world-class food, and affordable living options make it an attractive locale for any type of lifestyle. Add in that Thailand has invested heavily into its digital infrastructure in recent years, providing some of the fastest fixed internet speeds in the world, as well as one of the highest online penetration rates anywhere, and Thailand has become an increasingly attractive market for smart, innovative entrepreneurs in the digital and creative industries.

Components of Thailand's Startup Ecosystem

NIA facilitates cooperation between the five key components of Thailand's Startup Ecosystem:

Government Since 2016, when Thailand's Prime Minister enacted the Thailand 4.0 national development strategy, there has been a country-wide emphasis placed on the development of the nation's digital economy and innovation sector.

Since then, NIA, together with other government partners, have enacted numerous laws and regulations to support the growth of new startups, including the Startup Act which provides investment and tax incentives for both local and foreign startups located in Thailand, and the Regulatory Sandbox Act which gives regulatory support for businesses experimenting with new and innovative ideas in the targeted sectors of finance, e-commerce, telecommunications and more. In addition, Thailand's Board of Investment (BOI) offers tax incentives and a smart visa program to attract investors and new businesses into the country.

Startup Community Thailand boasts an active and engaged group of organizations supporting the startup community, with both publicly and privately funded accelerators and incubators found throughout the country. Co-working spaces can be found in every region of Thailand, with many providing regular networking opportunities with venture capitals and other funding for early-stage startups.

NIA and other government partners offer regular talent and skill development programs across sectors. NIA Academy, NIA's premier talent development program, empower new generation entrepreneurs, as well as enterprise and executive level learners, through more than twenty courses aimed at fostering innovation in their respective industries (Learn more on Page 54).

Investment & Capital NIA can help startups access funding through both public and private pathways, including various VC, angel investors, and institutional investors, from early stage investment through Series C and beyond. In 2021, \$310.58 million was invested into Thailand's startup community, down from \$376.17 million in 2020. Proof that Thailand's startup community is still emerging is shown in that 73% of nationwide startup investment was seed funding (THB 3.5-65 million; \$100,000-\$1.8 million) in 2021.

While investors are active in all sectors, there is a growing emphasis on the BCG, DeepTech, MedTech, FoodTech and AgTech industries.

Corporate & Associations Corporate Thailand and industry associations are both actively involved in startup support and development, many hosting their own accelerator and incubator activities. Many of Thailand's largest funding sources available to startups come directly from the private sector most eager to drive innovation in their respective areas of expertise.

PTT, True, dtac, Central Group, LINE, and much of the Thai finance sector have active funding programs targeting startups in every stage of development (Learn more on Page 72).

Research Organizations & Universities Together with NIA, many of Thailand's top universities and research institutions have created startup support programs to connect local entrepreneurs with mentors and startup advisors. In conjunction with these programs, regional science & research parks have been established to focus on targeted innovation in certain sectors, like the Northern Science Park (NSP), which includes the Science and Technology Park, Chiang Mai University (STeP) (Learn more on Page 41).

Key Sectors of Startup Thailand

Thailand has startups operating in nearly every industry, but as of 2022, the top five startup segments in the country were Business Service (26%), PropTech & UrbanTech (11%), MARTech (11%), Lifestyle (10%), and DeepTech (10%).

However, NIA and its partners in Startup Thailand have targeted three sectors for growth and promotion, namely BCG (Bio-Circular-Green) Economy businesses, AgTech & FoodTech, and Medtech, in an effort to more substantially capitalize on some of Thailand's existing strengths.

11 Startup Sub-sector in Thailand 2022

The companies in **Business Service** sector are focused on creating service systems to give value to their clients and to fulfill their obligations as both service providers and service consumers.

Thailand Startup Ecosystem Overview

Part of a fast growing ASEAN region, Thailand is becoming a leader in startup business and talent development.

Thailand has long been a hub for travel and business in Southeast Asia, and now Thailand's burgeoning digital economy and investment in digital infrastructure have made a country already known for its irresistible food and culture an ideal destination for startup investment and growth.

Thailand and ASEAN

Doing Business in Thailand & ASEAN

Reports from Google and Temasek Holdings, and Bain & Company show that the **online industries in Singapore, Malaysia, Indonesia, the Philippines and Thailand, which are among the largest economies in the region**, are estimated to be worth a total of 300,000 million US dollars (about 10 trillion baht) in 2025.

In the World Bank's annual Ease of Doing Business Index, Southeast Asia's tropical trade center Thailand once again placed in the top 30; **ASEAN's friendliest business location is developing into a regional hub for advanced sectors/smart industries**. It recently introduced a series of new incentives, including tax breaks, subsidies for matching investments, and eased laws governing property ownership.

Join a network of Southeast Asian startups

Southeast Asia Startup Assembly (SEASA) was incorporated in 2019. SEASA is an annual government to government (G2G) forum that centers specifically towards bringing together key startup government agencies into discussion regarding the main problems and issues faced by each individual country. It aims to continue cross-government partnerships and cooperation to advance the Southeast Asian startup ecosystem and plus countries to identify, diagnose, and solve problems that work as barriers against regional startup growth.

Why are there so many startups here?

In the ASEAN region, there are 400 million internet users, and 10% of them went online for the first time in 2020, indicating a still developing market.

In addition, investors who want “explosive growth” tend to invest in ASEAN startups, which provide faster returns than investments in traditional industries.

Thailand is an increasingly attractive market for smart, innovative ideas in digital and creative industries as its population of 70 million gains greater connectivity and spending power.

Agreement on the SEASA Declaration on Collaboration in Research, Innovation and Digital

- Promote the ASEAN Plus region to the international level by focusing on being a innovation-hub where collaboration takes place in areas of similar interest
- Strengthen existing cooperation in promoting future research, technology, innovation and digital work.
- Create opportunities and possibilities for innovative startups to transform successful businesses by leveraging capital, knowledge and networking.
- Solve unfair problems and obstacles that hinder the growth of ASEAN Plus companies with global competitiveness.
- Highlighting the need for this cooperation to promote competitiveness and innovation
- Promote SEASA activities in the region and to promote innovation management and knowledge sharing in the field of startup ecosystems.

Country Overview: Thailand Strategic Strengths

Map highlighting Thailand's central connectivity to the region

GEOGRAPHY Access Southeast Asia

Thailand's central location provides easy access to neighboring countries in Southeast Asia, East Asia (China), Central Asia (India) and the broader Asia-Pacific region for **optimal business and travel connectivity**.

CRAFTED LIVING DESTINATION Quality of Life and Lifestyle

Thailand is a country vibrant in culture and rich in natural beauty, making it one of **the most attractive destinations** for tourists and expats in the world. Thai's friendly nature and the amenities to match every lifestyle make Thailand a place where anyone can achieve a **high quality of life on a very affordable budget**.

INNOVATION-BASED ECONOMY Thailand's Innovation Decade

Thailand is **the second largest economy within ASEAN** after Indonesia (GDP of \$501.71 Billion, Statista, 2020). And ranked **Top 50 StartupBlink's Global Startup Ecosystem Index 2021**.

According to the Global Innovation Index (GII), Thailand ranks 43rd among 132 economies featured in the GI 2021.

43rd Thailand ranks 43rd among 132 economies featured in the GI 2020

Ranking of Thailand (2019-2021)

	GII	Innovation inputs	Innovation outputs
2021	43	47	46
2020	44	48	44
2019	43	47	43

Upper middle-income group economies:

Thailand has high scores in all GI pillars, which are above the average of the upper middle-income group.

5th Thailand ranks 5th among the 34 upper middle-income group economies

Southeast Asia, East Asia, and Oceania : Compared to other economies in Southeast Asia, East Asia, and Oceania, **Thailand performs above the regional average in two pillars, namely: Market sophistication; and, Knowledge and technology outputs.**

Thailand ranks 9th among the 17 economies in Southeast Asia, East Asia and Oceania

INFRASTRUCTURE Connected and Fast!

With the advent of Thailand 4.0 in 2016, Thailand's national development strategy focused on digital transformation, Thailand has invested heavily in providing **world class internet infrastructure** to support the growth of technology startups and other high growth industries dependent on the Internet of Things and high speed broadband connections.

According to Global Digital Report 2021 by We Are Social and Hootsuite, Thailand has, on average, **the fastest fixed internet connections in the world** at 308.35 megabits per second (mbps), and the second-fastest mobile internet connections in Southeast Asia after Singapore at 51.75 mbps, as of January 2021.

Thai society holds one of the **highest online penetration rates in the world**, providing a business environment ripe for growth in innovation technology, e-commerce and online marketing technology.

Overview of Thailand's Startup Ecosystem

Stakeholders and Ecosystem Dynamics

Robust and collaborative ecosystems are one of the primary factors in the rate of success for startup businesses. The diagram to the right shows how NIA facilitates the networking of key stakeholder groups within the Thailand Startup Ecosystem through its NIA Network & Alliance.

NIA and its partners support and work with the startup community to connect them to funding, networking and talent development, and play an intermediary role of connecting startups to necessary resources both domestically and internationally. **NIA has the essential duty of strengthening collaboration between players in the 5 key stakeholder groups:**

Government

Investment & Capital

Startup Community

Corporate & Association

Research Organization & Universities

NIA has developed mechanisms of bringing these stakeholders together to collaborate at various scales, from providing regulatory support for startup growth at the national level, to collaborating with research institutes and universities to establish regional centers of innovation development, found in all five of Thailand's regions (Learn more: Chapter 2, Page 28-47), and more localized Innovation Districts that impact growth in targeted sectors (Learn more: Yothi Medical Innovation District, Page 32-33 & Suan Dok Medical Innovation District, Page 42-43).

NIA bridges Thai startups with international counterparts through a suite of global startup services (Learn more: Page 54) and facilitates talent development and business accelerators through its NIA Academy (Learn more: Page 55-59). And, most importantly, it connects startups to funding at all stages of development (Learn more: Page 26-27).

NIA and local Thai government agencies facilitate Thai startup growth and expansion to the global scale by linking and attracting international partners, investors and talent through government startup support policies, regulations and programs.

Startup Funding in Thailand

Value of Investment in Thai Startups, 2017-2021

Startup Funding Stages in Thailand

Stages VCs, CVCs, and Startup funding agencies in Thailand

Early Stage

Pre-Seed Funding

This stage is commonly known as bootstrapping. You must use your own existing resources in order to get the operations off the ground.

Seed Funding

During this stage, a startup receives help in determining its final products and demographics.

Series A

It's the first round of venture capital financing. In this stage, the startup is all set in terms of product development and has to provide preferred stock to investors.

Series B

This stage allows startups to grow so that they can meet the various demands of their customers.

Series B+ (Series C and beyond)

In this stage, startups search for more funding to help them build new products, reach new markets, even acquire other under-performing startups.

IPO

IPO is the process of offering corporate shares to the general public for the first time.

Regional & City Innovation Hubs

Each city and region of Thailand has a unique character and role to play in the Thailand Startup Ecosystem, though 7 cities and 5 regional hubs stand out for their commitment to drive Thailand's startup future.

Introduction

Among the 77 provinces in Thailand, 7 cities in 5 regional areas are the fastest-growing ecosystems for startups, employing their own specialized support services aimed toward startup incubation, funding or networking and partnership development.

Those cities include Bangkok (Central region), Chiang Mai (Northern region), Khon Kaen (North-Eastern region), Chachoengsao-Chonburi-Rayong (Eastern Economic Corridor, EEC) (Eastern region) and Songkhla (Southern region). This chapter will highlight the characteristics of each city/region and their roles in the Thailand Startup Ecosystem.

Bangkok, Central Thailand

By far the largest and most economically diverse city in Thailand, Bangkok is the driving force of Thailand's Startup Ecosystem. Ranked by StartupBlink as the 4th most favorable city in Southeast Asia for startups, it is undisputedly the #1 ranked city in Thailand.

NIA has promoted two areas of Bangkok as national models for digital innovation, Punnawithi and Ari districts, pushing them to become two of the best developed ecosystems for startups in Southeast Asia, and drawing professional expertise from both inside Thailand and out to set up shop in these districts.

Talent

- Bangkok, the capital of Thailand, is home to the majority of essential startup services and startup companies in Thailand
- The startup ecosystem in Bangkok is supported by a strong agglomeration of research organisations and universities offering multiple incubation programs
- Center of business and state of the art technology
- Bangkok supplies jobs and education, accommodation and career opportunities for both local and international high skill talent in innovation and technology

NIA Innovation District Case Study

Yothi Medical Innovation District (YMID)

Thailand is regarded as a nation that is particularly strong in the medical field, internationally. Yothi Medical Innovation District (YMID) has been designated as a prototype location to promote medical research and innovation, tapping into the medical institutes, universities, research units, residencies and co-working spaces located within the 1.7 million square meter district to develop and invest into the country's medical innovations, with the aim of enhancing the economy and expanding Thais' access to modern medical services.

With direct operational support from NIA Headquarters, together with the Thailand Center of Excellence for Life Sciences (TCELS), and an alliance under three national ministries, the Ministry of Higher Education, Science Research and Innovation (MHESI), the Ministry of Health and the Ministry of Education, they have developed a suite of government policies and investment support mechanisms to make YMID a hub for upcoming businesses in the MedTech and DeepTech sectors, as well as MICE and food innovation.

#Center for Innovations in Medicine and Research

Vision and Objective

Yothi Medical Innovation District (YMID) aims to be The '**Center for Innovations in Medicine and Research**' with 2 objectives including:

1. Public Welfare Services -

Development of information technology to serve as a medium for providing information (data service platform) and being a center for medical services.

2. Innovation Investments -

Developing a medical research and development center for medical and health-related startups and mixed-use infrastructure development

3 Key Pillars in driving Yothi Medical Innovation District (YMID)

1. The district supports and enlarges the opportunity for complete research -

Develops the areas and ecosystem that are conducive to education, research and development, and will experiment with medical innovations within the region to reach international standards and acceptance.

2. Expand the Basic Growth of Medical Industry - Pushes forward and promotes investment by cooperating with startups among investors in different branches and developers of technology and medical apparatus. Reduces the cost of importing medicines and apparatus from abroad.

3. Improving the medical standard for Thais - Plans and develops the linkage between the database and medical services to offer the kind of medical services that bring in modern innovations and process data for treatment and healthcare for people in the area that seek treatment.

YMID One Stop Service

- **Funding & Incentive** - Provide research capital and additional benefits to government bodies and private companies that are interested in partaking in medical innovation research and development with departments in the district to create new concepts and medical innovations in the country.
- **Startup Support** - Encourage concepts from beginning to successful ending among startup companies and entrepreneurs; connect and coordinate cooperation between departments in the district to give birth to Deep Tech Startup.
- **Sharing Ideas & Partnered Projects** - Develop a network of cooperation between departments both inside and outside the district to support and encourage new ideas in medical innovation.
- **Consulting** - To advise government bodies and private companies that are interested in research development and medical businesses, with a network of departments in the district.
- **International Service** - Coordinate the collaboration of international networks to enhance the potential of business development and medical innovations in the district.
- **Database Provider** - To drive all research and investment to move smoothly, continually, and effectively through a big database that is data linked.

Funding Policy: Project Funding Support

Note: The budget for each project is not more than 5 million baht (\$137,893)

Organizations that will be eligible for project grants must meet the following qualifications:

1. **Agency and cooperation:** Must be a network agency under Yothi Medical Innovation District or have cooperation with network agencies within YMID with cooperation in 2 types;
 - At least two departments within the district cooperate in developing the project.
 - External agencies (juristic persons, companies, entrepreneurs, and other agencies) cooperate in research development with departments within the district or cooperate with district agencies to bring results or innovations from outside to test within the district.
2. **Innovation:** Medical research covering both products and services.
 - Medical and health materials, tools, equipment and services
 - Innovation in medicine, biomaterial
 - Food and natural extracts

The goal is to care for patients through prevention, health promotion, diagnosis, treatment, and rehabilitation to increase the quality and efficiency of patient care. And to help medical personnel and help improve people's health/quality of life. Projects with a tendency to produce products/services to the market within 3 - 5 years are prioritized.

Bangkok, Central Thailand

Resource Center

Creative Economy Agency (CEA) – Thailand Creative & Design Center (TCDC)

CEA's vision is to foster significant economic development in Thailand through the promotion of creative economy initiatives and ventures. Thailand Creative & Design Center's (TCDC) main objective is to promote a creative economy and create opportunities for people to access knowledge and creativity, and to develop the quality of human resources that are ready for the future. The 5 branches of TCDC are TCDC Bangkok, TCDC Chiangmai, TCDC Khon Kaen, Mini TCDC, AIS D.C. and TCDC COMMONS Season Square.

TCDC is one of Asia's largest design and creativity resource centers with material and design databases, articles, online exhibitions and a Fabrication workshop/makerspace with 3D printing. The facilities and services aim to be a place for designers, students, entrepreneurs and enthusiasts in design and creativity to develop and expand their knowledge and skills as well as to help strengthen the capability and competitiveness of Thai designers in a global marketplace.

TECH BITE

International Startup Incubation Program
Techbite is a tech venture building incubation/acceleration program by KX Innovation Center that supports startup around the world that are looking for knowledge, space, and mentorship in expanding their business in Bangkok, Thailand and ASEAN.

- World class mentoring & coaching
- 20,000 sq.m. building in the heart of Bangkok
- Smart visa facilitation
- No equity required
- Build your traction and go international
- Prototyping development support
- VC network
- Workshop/training and community event
- Office rental opportunity

Investment Opportunities for #Startup with 'Growth Program for Startup 2022'

Project by NIA, TED Fund, KX

- World class mentoring & coaching
- In depth workshop & training on gap analysis & positioning and business financial consulting
- More than 10 HOURS of one-on-one mentoring session
- Access to top investor network in Thailand
- Financial model & analysis consultation
- The 3 best performing teams will receive a due diligence & company valuation

Bangkok, Central Thailand

University and Incubation Hub

Chulalongkorn University

CU Innovation Hub

CU Innovation Hub is a community network of student startup accelerators, established by Chulalongkorn University. CU Innovation Hub is committed to create the startup innovation system in Thailand by supporting high potential startups across all industries outside and inside the university.

Vision: Innovation Center of Chulalongkorn University, Creation of knowledge and innovation to promote Thai society towards sustainable development

Mission: The CU Innovation Hub fosters innovation and talent that improves how Thais live, learn, play, and thrive. The center is in charge of helping CU personnel and students develop their entrepreneurial, creative, and critical thinking abilities via research, instruction, contests, and other activities while also delivering their creative ideas for the good of society and the economy.

Industries: Venture Capital and Private Equity Principals, Promote innovation and talent building in Aging Society, Digital Economy & Robotics, Sustainable Development and Inclusive Community & Smart City.

Chulalongkorn University Technology Center (CU UTC)

Vision: Collective elevation of society, the economy and the spirit through the power of deeptech

Mission: Springboard impactful deeptech to solve the toughest national challenges

Industries: Focus on deeptech research advancement in the following verticals: Medtech and AI/Data Science

Activities: CU UTC AI Academy - Training and Apprenticeship Program: workshop and seminar (2-Month intensive training and 12-Month Apprenticeship)

BLOCK 28 CREATIVE & STARTUP VILLAGE

Promote the STARTUP business to support and answer the use of space for businesses that are emerging as CREATIVE & STARTUP VILLAGE. Property Management of Chulalongkorn University (PMCU) has a mission to develop commercial areas into spaces of opportunity for everyone and to foster the Chula Smart City area to become a livable smart city. BLOCK 28 has a significant advantage of being near Chulalongkorn University, which is a knowledge center and experts in various fields to assist in research and development, which also answers the needs of the new generation of businesses and Chulalongkorn students who want to do internships or work part-time.

- Restaurant, shops and services
- Offices with flexible working hours for Creative Startup groups in various fields such as FinTech, FoodTech, HealthTech, etc.

Bangkok, Central Thailand

University and Incubation Hub

Thammasat University

TU 88 Sandbox

Thammasat University has launched “88 SANDBOX: The Next Unicorn Platform”, a center for learning entrepreneurial skills of the future, with a network of 88 Sandbox Partners as sponsors and will act as “Mentor businessmen” (Mentor) to pass on success to create a “unicorn”

Areas of 88 SANDBOX have all the elements to support and create a suitable environment for Thai startups. It promotes and helps develop skills and knowledge from educational institutions such as Thammasat and various business partners. 88 SANDBOX's activities are listed below.

1. **Skill Space** – Develop entrepreneurial skills through the Learning Platform and create an idea marketplace
2. **Expo** – the largest startup exhibition will be a space for creative people to meet and gather
3. **Pre-Hackathon** – Startups will be closely monitored and mentored by business mentors to develop their skills, ideas and work methods
4. **Hackathon** – a platform that will bring startups in the project to compete, and those who are elected will receive investment funding
5. **Forest of Unicorn** – provides a full range of privileges and an environment that is conducive to growth for startups and will enable all startups to enter the business world fully

Chiang Mai, Northern Thailand

Chiang Mai is the economic powerhouse of the north, particularly with regard to startups due to its outstanding diversity as a creative city, a strong university network, livable accommodations, young people with tech and innovation skills, and its status as a global tourism hub.

NIA established its first regional office in the Science and Technology Park (SteP) of Chiang Mai University to promote, support and develop innovation in all 11 provinces of the northern region. A partnership has been established with Chiang Mai Municipality to promote the city center as a laboratory for innovation, and to promote and address the issues of city communities (City Lab). Suandok Medical Innovation District (SMID) has been developed as a district to foster growth of businesses involved in medical innovation and as a regional center for health care. There is also a district for innovation in agriculture and food, which has now started to expand into agri-business and food processing industries.

Talent

- Chiang Mai is a popular working destination for local and international digital nomads, tech talent and programmers

Notable Startup Sector

- 🍷 FoodTech+AgriTech (Maejo University)
- 🏥 MedTech+HealthTech (Maharaj Nakorn Chiang Mai Hospital, affiliated with the Faculty of Medicine of Chiang Mai University)
- 🏢 MarTech

Government

- NIA : National Innovation Agency - NORTHERN REGIONAL CONNECT @Northern Science Park
- NIA launched the first regional office with plans to upgrade innovation in 11 northern provinces, aiming to push Chiang Mai to become a regional hub of innovation

Chiang Mai, Northern Thailand

Coworking Spaces

There are over 20 co-working spaces in Chiang Mai, the average desk price in Chiang Mai is THB 3,222 (\$89)/month

- 1) Yellow Coworking Space (Co-working)
- 2) CMU Learning Space
- 3) Punspace Tha Phae Gate
- 4) Hub53 Coworking and Coliving Space
- 5) Alt_ChiangMai - coliving & coworking space
- 6) Planter's Coworking Space
- 7) Lana Co-working Spaces
- 8) Code Space Co-working Space
- 9) Life Space
- 10) StarWork Chiangmai
- 11) Heartwork the Sharing Space
- 12) Niramis Co-Creating Space
- 13) P.work co office space
- 14) Guru's Box Co-Working & Learning Space
- 15) One Workspace
- 16) IN THE CITY Co-Licing & Co-Working Space

University and Incubation Hub

There are incubation programs and supporting universities throughout the Northern region

Science and Technology Park, Chiang Mai University (STeP) the headquarter of Northern Science Park (NSP), working in collaboration with 13 other universities in the Northern region of Thailand.

NSP offers total innovation solutions for enterprises by using science and technology resources from these seven universities. NSP also provides a smart launchpad for tech startups and incubation programs. The NSP building is fully equipped with facilities for innovative business development and a supportive innovation ecosystem. Since 2018, NSP Building has been used for Total Innovation Solutions (TIS) services, including

- Science, Technology, and Innovation (STI) Service
- Tech startups incubation programs
- Research and Business Development (R&BD) programs
- Business matching and funding support
- Office spaces for innovative business and tech startups
- Essential supporting facilities, Innovation Ecosystem and lifestyle for 24/7 working

Basecamp24 – Startup Platform

Northern Science Park (NSP) has launched (March 2022) the startup platform “Basecamp24,” with the goal of developing the potential of startup entrepreneurs at all levels through a comprehensive business incubation program in a 24-hour Startup Ecosystem at STeP.

STeP is equipped with workspace (Startup Space), creative concept space (The Brick Series), prototype maker space (The Brick FABLAB), office space, and incubation services such as knowledge development courses, expert consulting sessions, networking, and business matching activities.

Basecamp24 is divided into 5 levels as follows:

- **Ground camp: Wonderer** – motivating and raising entrepreneurial awareness
- **Camp 1: Bootstrapper** – providing knowledge to create entrepreneurship. And generate business ideas that meet users’ pain points and market demand
- **Camp 2: Explorer** – learn practical process of business management and market validation to generate strong business plan for growth
- **Camp 3: Challenger** – focus on expanding the market by emphasizing the process of business planning, scaling-up strategies
- **Camp 4: Survivor** – concentrate on investment, seeking investors and joint venture opportunities with potential partners that can help the firm expand sustainably

Chiang Mai, Northern Thailand

NIA Innovation District Case Study

Suan Dok Medical Innovation District (SMID)

Chiang Mai Province has many outstanding international educational institutions and medical services. In the area of Suthep Road or Suan Dok area, there is an agglomeration of the Faculty of Medical Sciences of Chiang Mai University with public health service units, private hospitals and clinics, startup companies, medical innovation centers, medical product research and development center, co-working space and a wide range of medical activities and services.

The National Innovation Agency, Faculty of Medicine and The Faculty of Health Sciences, Chiang Mai University and the Northern Science and Technology Park have established the “Suan Dok Medical Innovation District” for the purpose of promoting innovation in the area.

Startup in Suan Dok Medical Innovation District has formed a group of CNX Health Tech Startup to connect and exchange information on product and innovation development and help promote the Startup Ecosystem and access to funding sources.

Vision and Objective

Suan Dok Medical Innovation District (SMID) aims to be The ‘Center for Innovations in Medicine and Research’ with excellence and interdisciplinary medical service. The promotional area will drive health care through innovation, transfer of research and innovation to market. With the goal to be a sustainable center of medical innovation in the northern region, SMID 2 objectives include:

1. Public Welfare Services

Development of information technology to serve as a medium for providing information (data service platform) and being a center for medical services.

2. Innovation Investments

Developing a medical research and development center for medical and health-related startups and mixed-use infrastructure development.

4 Key Pillars in driving Suan Dok Medical Innovation District (SMID)

1. To be medical service district - To promote, improve and advance healthcare services in the communities through health systems aiming at providing our patients a convenient access to high quality health care.

2. To be a special center of excellence and transdisciplinary service - To promote specialist medical services and a development of centers of excellence for specialty medical clinics as well as embracing integrative transdisciplinary approaches in services, researches and healthcare innovations.

3. To develop medical innovation on service and product - To foster the development of innovative services and products by bringing innovation into service design and creating value added in product design.

4. To be a health and MedTech startup incubator - To foster, develop and incubate MedTech Startups in order to induce new startups and build new opportunities for economic advancement in the area.

Services

Due to the rapid change in technology and new innovations, the creation of efficient research and innovation is the key to driving the development of health services. Suan Dok Medical Innovation District has a system to support researchers and innovations through various channels, including:

- **Research & Innovation Funding**
- **Innovation Program** - helps innovations arise and grow efficiently from central agencies such as the National Innovation Agency or The Northern Science and Technology Park through programs such as the Incubation program, accelerator program, Health Hackathon, etc.
- **Business Matching Support** - SMID is a medium to connect researchers and innovations with the private sector to promote the commercialization of research and innovation.
- **Academic Medical Conference**
- **Intellectual Property Registration Consultation** - provides advice on intellectual property registration, medical innovations and forwarding to agencies operating both within and outside Chiang Mai University.
- **Technology Transfer to the Private Sector**
- **Regulatory Sandbox** - a medical innovation experiment area, supports the use of research and innovations to be tried or tested by creating a mechanism that is a real market-like environment to encourage innovation or new business models.

Chachoengsao-Chonburi-Rayong (Eastern Economic Corridor, EEC), Eastern Thailand

Eastern Economic Corridor or EEC is another strategic area targeted for industry development by the central government, covering the provinces of Chonburi, Rayong and Chachoengsao. EEC houses leading educational institutions, research departments, logistics hubs and residential areas for both urban and in rural communities. The region also boasts extensive tourism, agriculture, and food sectors, and has been designated a ‘sandbox’ area for startups to introduce technology and innovation.

There are 12 target industries (S-Curve) comprising modern automotives, smart electronics, health tourism, robotics, aviation and logistics, defense and digital. To promote startups in this area, NIA has focused on deep tech startups in the areas of ARI (Artificial Intelligence, Robotics, Immersive & IoT), as well as pushing for the readiness of the space structure to support startup investments. These have already had the opportunity to work with over 10 large industrial sectors, and in 2021-2023, there will be Pre-series A investment in startups at a minimum 30MB per startup. This effort is centered at Eastern Science Park (EAST Park) of Burapha University.

EEC have designated 12 promotional zones for 12 target industries and area-based innovation development infrastructure.

- EECh - High Speed Rail Ribbon Sprawl
- EECg - Genomics Thailand
- EECd - EECd Digital Park
- EECa - Eastern Airport City
- EECi - EECi Innovation Platform
- EECmd - Medical Hub

University & Incubation Center

Notable Startup Sector

Target S-Curve and New S-Curve Industries with a particular focus on

-  ARI-Tech (Artificial Intelligent, Robotics and Immersive)
-  Food for the Future
-  Agriculture & Biotech
-  Digital
-  Smart Logistics

Incubation Program

EEC Deeptech incubation program with Burapha University to connect with big corporations in the area called NIA Deep Tech sandbox @EEC.

It aims to promote and give opportunity for Deep tech startups in Thailand to expand their network, develop skills and potential readiness to increase product development capabilities and continue to expand the business in the EEC area.

With partner organisations in creative innovation solutions the program will foster Public-Private Partnership (PPP) with a special focus on ARI-Tech startup sub-sector.

-  Artificial Intelligent (AI)
-  Robotics
-  Immersive IoT

In collaboration with 12 industrial groups such as agriculture, food, and transportation to bring technology and innovation to meet the needs of the area in a variety of target industries.

Offering mentoring & Coaching from experts in technology, innovation and business industry

Coworking Spaces

The average desk price in Pattaya is THB 5,125 (\$142)/month

- 1) Anchor Coworking Space – Pattaya
- 2) Co-Working Space Success Sriracha
- 3) The 90's WorkPlace
- 4) The Factory Co-Working Space
- 5) rPod Coworking Space

Khon Kaen, Northeastern Thailand

Khon Kaen is the commercial and political center of Northeastern Thailand, and it is widely renowned for its high-quality silk production. Khon Kaen, located in the heart of Isan, Thailand's northeast region, has been one of the country's fastest-growing areas.

The Thai government designated Khon Kaen as the Indochina Region's export center, and both Laos and Vietnam maintain consulates in the city to process visa applications.

Khon Kaen is also home to Khon Kaen University, the largest university in the northeast and a prominent center of education and technology.

Talent

Khonkaen is driven by an active community of local business leaders and university network, exemplified by the Khon Kaen Think Tank

University & Incubation Center

Khon Kaen University Science Park (KKUSP)

Lower Northeastern Science Park (Nakhon Ratchasima)

Coworking Spaces

The average desk price in Khon Kaen is THB 2,486 (\$69)/month

- 1) Jump Space
- 2) ESC Coworking Space
- 3) SL Office
- 4) CLASS Cafe & Co-Working Khonkaen 24 hr
- 5) The Beegins Co-Working Space
- 6) TohShare @kku
- 7) The Space (Co-Working Space)

Songkhla, Southern Thailand

Hat Yai, a district of Songkhla, is well recognized as a southern communication, commerce, and transportation hub, as well as a gateway to Malaysia and Singapore. As a result, Hat Yai has grown in prominence as a driving factor of economic growth in the southern area.

Furthermore, Songkhla plays an important role in facilitating startup business incubation, innovation, and research technology in Thailand’s southern region, as well as expanding it to neighboring countries, with the Southern Thailand Science Park network, Prince of Songkla University as the host of the operation and as the center of collaboration among the other two universities, Walailak University and Thaksin University.

University & Incubation Center

Prince of Songkla University Science Park as the centre for Southern Science Park Building at Hatyai Campus (Extended Area)

Coworking Spaces

There are over 10 co-working spaces in Phuket, the average desk price in Phuket is THB 5,033 (\$139)/month

- 1) Phuket Coworking – Phuket
- 2) Grind Time Co-Workspace & Cafe – Phuket
- 3) KoHUB Lanta – Koh Lanta, Krabi
- 4) TAOHUB – Koh Tao, Surat Thani
- 5) Tuber – Songkhla
- 6) Kiddee Coworking – Songkhla
- 7) Khan Space – Koh Samui, Surat Thani

Essential Startup Support Services, Funding & Investment

Creating or locating your startup in Thailand is easy, with numerous incentives, regulatory support programs, and incubation and investment opportunities awaiting.

How to register your Startup in Thailand

Startups can register a business in Thailand with Department of Business Development, Ministry of Commerce.

กรมพัฒนาธุรกิจการค้า
Department of Business Development

For more information visit
https://www.boj.go.th/index.php?page=doing_biz_non_boj

Essential Laws for Startups in Thailand

A number of important laws and regulations have been enacted in recent years to support the growth and investment in the startup industry.

The Startup Act	Facilitates the founding of both local and foreign startups through tax incentives and foreign investor
The Regulatory Sandbox Act	Supports pivoting innovative ideas in the experimental process. (see more detail on page 51)
Thailand Research and Innovation Utilization Promotion Act (TRIUP Act); The Thai Bayh-dole Act	Allowing researchers or fund recipients to secure the right to their intellectual property research or Patent of their research and invention results, this will stimulate the production and development of commercial research in a concrete way and create employment and distribute income in the the country.
DPSB = The draft of the royal decree on digital platform service business	Aimed to enhance the credibility of digital service platform (DPSP) which is offering the goods, service or intangible assets and protect the consumers in connection with the platform. The related startup is required to notify ETDA within 30 days of enactment, including the firm located outside of Thailand that is providing its service in Thailand. DPSP is required to submit the annual report regarding the size of the platform, the terms and conditions of use and services, service fee, etc.
Capital Gain Tax Exemption	<p>The Ministry of Finance by the Revenue Department has issued tax measures to promote fundraising in startup enterprises. This will help support Thai startups to raise more capital from investors.</p> <ol style="list-style-type: none"> 1. Exemption of personal income tax and corporate income tax for both Thai and foreign investors for profits from the sale of shares in Startup. 2. To qualify for the tax exemption, startups must register 20 million and be certified by the NSTDA or NIA, and be businesses in 12 targeted industries. 3. Investors who invest directly (including angel investor) or through VC, CVC or PE Trust, will be exempt from gains on share transfers for 10 years (individuals and juristic persons, both Thai and foreign nationals). 4. Investors must hold shares in a startup company or CVC for more than 24 months, and the startup must have earned at least 80% of its core activity in the two-year period prior to the sale of shares. 5. Period for receiving tax benefits until June 30, 2032
PDPA = the Personal Data Protection Act	Aims to protect personal information in terms of use or sharing in the illegal collection without data owner consent, leading to the positive benefit of change, especially in B2C type of business.

Regulatory Sandbox

Financial Sector – BOT’s FinTech Regulatory Sandbox

The Bank of Thailand (BOT) sandbox is aimed to develop and experiment with financial innovation to support FinTech startups in Thailand which can enter the sandbox and could be developed to be infrastructure or centralised standard for the financial sector. Besides the financial products and services regulated by the BOT or apply to be tested under their own sandbox scheme under BOT, if the product and service are not classified as an above case to be tested.

For more information visit <https://www.bot.or.th/Thai/FIPCS/Documents/FPG/2562/EngPDF/25620188.pdf>

Electronic Transactions – ETDA’s Digital Service Sandbox

Electronic Transactions Development Agency (ETDA)’s Digital service sandbox is a project for testing innovation or service in electronic transactions for a juristic person (which means the public, private, start-up and group of person)

The open innovation or service for testing can be divided into 3 types: e-document, e-meeting and digital ID. The applicants can join the digital testing service by preparing the applicant information, innovation related to digital service, use case and testing plan.

For more information visit <https://www.etda.or.th/th/Our-Service/Digital-Service-Sandbox.aspx>

Broadcasting and Telecommunication – NBTC’s Regulatory Sandbox

Office of the National Broadcasting and Telecommunications Commission (NBTC) has implemented the sandbox to support operators’ development and isolate testing in communication, telecommunication and broadcasting innovation with the deregulation concept.

NBTC’s Regulatory Sandbox Notification

Sandbox Owners

(Serve as sandbox coordinators)

1

Submit a request for setting up a sandbox

Innovation Developers and Testers

2

Seek permission for using frequencies in innovation development and testing in the sandbox

Set up the sandbox

Frequency utilization request is approved

3

Develop and test innovations in the sandbox

For more information visit <https://bit.ly/3AkhheE>

Startup Incubation Center in Thailand

The ease of establishing a startup in Thailand provides information from the beginning of the process of business establishment in terms of the startup ecosystem and consulting with experts to creating networking among investors to create global startup hub.

Government Startup Incubation Program

BOI offers consultation services via ZOOM webinar through an e-booking system.

Investors must select relevant divisions, which are divided into 4 divisions of investment promotion and 2 divisions of investment monitoring, providing full operation startup audit.

NIA's Global Startup Hub Service

Center of information provides basic knowledge and the opportunity to gain a source of funds and access to ecosystem infrastructure (See more on Thai Government Support: NIA's Global Startup Service, Page 54)

NSTDA's Business and Entrepreneurial Acceleration Programs

Business Incubation Center (BIC) offers integrated support to new tech investors and business entrepreneurs including business consulting services, mentorship, business acumen workshops to help promising technopreneurs bring their ideas to products that can enter the market for traction and scale. BIC consists of Young Technopreneur Development Program, Incubation Program and Food Accelerator Program.

<http://nstda.or.th/bic>

Private Startup Accelerator and Incubation Program

TechGrind Incubator is Southeast Asia's first private technology incubator investing in promising startups at early stage - preferably before seed-funding. Its incubator program aims at helping startups focus on growth and validation so that the startups become highly-scalable technology companies.

<http://xcel.techgrind.asia/>

Hubba Accelerator

HUBBA Accelerator is a next-generation accelerator established in partnership with Investible, an Australian early-stage investment group, with an eight-week program.

<https://www.hubbathailand.com/hubba-accelerator>

Sprint Accelerator

(co-founded by SCG Chemicals, Houston Technology Center Asia, SASIN, KX and TCELS) It is Thailand's first specialized accelerator and incubator for science and technology, Sprint offers a 3-month accelerator program for deep tech startups at the early or seed stages.

<https://sprintacceleratorthailand.com/>

Stormbreaker Venture (under Disrupt) is the first EdTech-focused venture capital fund in Southeast Asia. The eight-week boot camp accelerator program aims at transforming the EdTech ecosystem by providing the startup's accelerator funding and access to a mentorship program.

<https://www.disruptignite.com/stormbreaker>

True Incube (under True and CP) is Thailand's leading startup incubator and accelerator offering one stop services and thriving ecosystem for startups and tech entrepreneurs. With the aim to become the leading CVC in Thailand and SEA for global VCs and potential tech-companies.

<https://www.trueincube.com/>

AIS The Startup is a business partner promotion program between AIS and promising scalable start-up businesses in 6 targeted new business: Gaming, VDO and Streaming, Digital Payment, InsurTech, HealthTech and EdTech. AIS The Startup will support startups with extended connections and business knowledge through 'AIS Business Ecosystem'.

<https://www.ais.th/thestartup/>

PLUGANDPLAY THAILAND

Plug and Play Thailand

A Global innovation ecosystem developer that brings together technology startups, corporations, governments and investors. Plug and Play Thailand accelerating startups in Smart Cities Program and its Food and AgTech Program.

<https://www.plugandplaytechcenter.com/thailand/>

KATALYST (Under Kasikornbank)

is a partnership program to support startups with various business needs to create a Win-Win Solution. With the goal to develop the potential of Thai startups with knowledge, expertise and connections from various departments, affiliates and alliances of Kasikornbank.

<https://katalyst.kasikornbank.com/th/pages/index.html>

Bangkok Bank InnoHub

Thailand's first global fintech accelerator program that allows startups to collaborate with Bangkok Bank. During the 12-week program, startups will receive dedicated mentorship from financial experts from across Bangkok Bank and Bualuang Ventures, as well as strategic guidance from international venture firm and innovation provider, Nest.

<https://www.bangkokbankinnohub.com/th/>

Krungsri RISE

Krungsri RISE and RISE.AI (under Krungsri Finnovate)

Krungsri RISE is Thailand's first corporate fintech accelerator that was established from collective efforts between the companies in Krungsri Group, the public sector. With the aim to enhance the competitive capacity of fintech startups at the regional level.

RISE.AI is the first Corporate AI accelerator in Southeast Asia. The innovation platform aimed at achieving concrete results utilizing the application of the startups' solutions to real-life problems.

<https://www.krungsrifinnovate.com/en/Home/VB-ecosystem>

Thai Government Support

NIA's Global Startup Service

NIA strives to be a part of building and upgrading startups in Thailand to be well known and competitive. Including attracting foreign startups to set up business in Thailand.

The Global Startup Hub is Thailand's center for startups and community network founded by Startup Thailand & National Innovation Agency (NIA). The objective is to support Thai and international startups through the services, networks, activities, knowledge, as follows;

- Supplying fundamental business information, such as government assistance, startup visas, fundamental details on establishing a business in Thailand, investment promotion for technology companies, etc.
- Organizing events to foster networking, offer chances for business expansion, and promote both online and offline formats
- Providing consulting session from experts in business aspects in terms of law, marketing, visa application for startups, includes investors and VCs from leading companies.

The Global Startup Hub Service includes

Centre of information provides essential knowledge and the opportunity to gain a source of funds and access to ecosystem infrastructure

Landing Pad Service is an international collaboration between NIA and partners to provide an accelerator program to support foreign skilled labours and startups

NIA: Startup Support Program

Managing Innovation Development Credit (MIND CREDIT) is a funding mechanism with 1 year of consultant service starting from the signing day with NIA. The number of funds given will be limited to 1 million baht (\$26,986) and not exceed 75% of the total consultant fee proposed (not including VAT).

Open Innovation is focusing on highly innovative new S-curve industries. The eligible applicants should be small and medium enterprises (SMEs) and startups whose business model innovation is repeatable and scalable for adding more value in exponential growth.

SPARK Accelerator is the 12-week boot-camp incubator program between NIA and AGW, an Israel-based venture capitalist, that supports high-potential early-stage Thai startups through intensive mentoring sessions with international experts to guide and improve startups' capabilities, products and solutions.

Thematic Innovation is a program for food, farming, wellness and healthcare startup. The participating company must meet 3 criteria: the executives have at least 3 years of business experience, must have experts involved and the project can solve the overall industry's problem. The funding is provided up to a maximum of 5 million baht and will not exceed 75% of the total project budget.

Timeline: February - April

Thai Government Support

NIA Talent Development Program

NIA Academy aims to empower people to become knowledgeable in how to foster innovation, with 20 highlighted courses geared towards both youth and new generation entrepreneurs, as well as enterprise and executive level learners.

FoodTech & AgTech

Food Technology refers to businesses and approaches that, among other things, use the Internet of Things (IoT), big data, and Artificial Intelligence (AI) to transform the agrifood industry into a more contemporary, sustainable, and effective sector at every stage, from food production to distribution and consumption.

Agrotechnology, often known as agricultural technology, is the use of technology to agriculture, horticulture, and aquaculture with the goal of enhancing productivity, effectiveness, and profitability. Agricultural technology can be products, services or applications derived from agriculture that enhance various input/output processes.

SESAMİLK

Sesamin is an active compound found specifically in sesame. From the researches of various institutes, it is found that Sesamin is highly beneficial to the body. With the advanced manufacturing process of Sesamilk, it can extract out natural Sesamin from sesame seeds to be in the sesame milk for the body to obtain the most benefits of Sesamin.

Yindii is on a mission to fight the food waste problem, trying to help at a local scale. The food that we deal with here at Yindii is high-quality surplus, delicious and perfectly edible, that stores and restaurants have to dispose of at the end of the day due to excess availability. This can range from supermarkets that have fresh vegetables that weren't sold, premium bakeries that need to bake fresh every day, or buffet restaurants that refill quality food up to the last hour. Enjoy the N.1 surplus food delivery with flash sales & amazing discounted prices while making a difference for Thailand
